Street Ethics in Chicago. A law has been enacted in Prussia which makes it a prison offense for any one to fall to answer a cry for help or to go to the rescue of a person in danger when it is possible to do so without endangering one's ows life. Such a law would not be amiss in Chicago. Not only ethics, but or dinary decency and manliness are too frequently forgotten here. Let a thug assault a person in the street and the majority of men who happen along, instead of going to the assistance of the person assaulted, will scurry away so as not to be dragged into the affair. Let a person be injured by a street ear half the people who witnessed the accident will refuse to give their names to be called upon as witnesses

Whether all the ethics of citizenship oun be enforced effectively through laws and ordinances may be doubted, yet, the legal declaration of some primary duties would help to develop a conscience in such matters now apparently sadly lacking.-Chicago Tribune.

Things Queer and Curious

Parda Nashin on the Ice

This picture of the Maharanee of Indore learning to skate in Europe Is particularly interesting because in her own land she is a parda nashin-that is to say, one who sits behind the curtain, an occupant of the Zenana. Parda means "curtain" or "screen." The Zenana is the name for that part of the house occupied by the women, and the Parda is the division which cuts off the women's quarters from the rest of the house. Where the Zenana system is in vogue, no men, other than the head of the house and his sons, are allowed to see the women, who do not take part in public life. The Maharajah of Indore, who is entitled to a salute of nineteen guns and to a salute of twenty-one in his own territory, rules over a state 9,500 square miles in area. The prevailing religion is Hindu. The Maharanee must not sit to a photographer, but, obviously, can be snapshotted.

pecially is this the case with swine.

SHOWS GROWTH OF LONDON which drops down for the hogs to

The remarkable growth of the city of London is graphically illustrated by this picture of its latest directory placed by the side of the first London directory which was printed in 1677 for Sam Lee. The little volume contains 120 pages, while that just issued has 3,656 pages and weighs 14 pounds.

LOFTY VOLCANO THAT SANK

The highest mountain in Oregon is Mount Hood, 11,225 feet above sea level, Compared with Mount Whitney, to the south in California, and Mount Rainier, to the north in Washington, each rising well above fourteen thousand feet, Mount Hood does not appear as a skyscraper. However, acording to the geologists of the United States Geological survey and other authorities, Oregon had at one time, probably before the dawn of life upon the earth, a great volcano which towered as far above Mount Hood as does Mount Rainier, possibly even several thousand feet higher. This was the great Mount Mazama. But thousands of years ago this mountain disappeared into the bowels of the earth and all that is left today is the huge rim around Crater Lake.

Crater Lake is the caldera of this extinct and collapsed volcano and is nearly six miles in diameter. The inside walls of the rim of the ancient mountain are in places nearly four thousand feet high and almost perpendicular. The lake itself is in places wo thousand feet deep and parts of the wall rise above its waters another ewo thousand feet. A restoration of the mountain in fancy, using as a basis the angles of the lower slopes, which still remain, shows that the spex could not have been far from liteen thousand feet in height, so that Mount Mazama was one of the most lofty and majestic peaks in the United States.

HOGS GRIND THEIR OWN FEED

The hog is not the lazy animal he seems, for in the west he is made to grind his own feed. The hog raisers out at the South Dakota agricultural bucket which had not been extinguished for fifteen years.

At Sarahad in Persia sacred fires are preserved from year to year, and not extinguished on penalty of death. There a single flame has been kept burning for 100 years as an appreciation of a service rendered the grand vizier by a Parsee trader. While in Sarahad exchanging wares this merchant accidentally discovered a plot against the grand vizier, and by announcing it saved the life of the official. And although the Persians are faithful Mohammedans and detest the belief of the fireworshipers, the grateful shah ordered the fire to be maintained to this Parsee.

HAVE A NOVEL OCCUPATION

A dollar a day just for blowing one's breath was paid at the laboratories of the College of Physicians and Surgeons, New York, to eight women. The women were employed in connection with experiments in sick room ventilation. They were to breathe into sixteen ounce bottles imbedded in refrigerators, the food particles being removed from the breath during its passage through a rubber tube. The condensed vapor is to be analyzed chemically and the doctors hope, through their experiments, to better the conditions of the atmosphere in sick rooms.

FIRE WITHOUT FLAMES

An engineer has invented a way to have fire without flame. His apparatus consists of a porous plate or mass of fire resisting fragments within which he mixes inflammable gas and air in the right proportions. When the gas is first turned on and lighted it burns with a flame at the surface of the plate.

When the flame is turned on the flame disappears, but the heat increases. A temperature of 5,200 degrees is claimed. Just what use of this invention can be made is yet a

TOWER OF LIONS AT TRIPOLI

shifting particles. One wind storm Two Historic Examples to Show That This Is by All Means a Dangerous Practice.

In the titles of books lie at times pitfalls for the unwary. An almost classic example was afforded by John Ruskin, when, in 1851, he wrote a short pumphlet on the text, "There shall be one fold and one shepherd." This, which treated of the rounion of the Protestant churches, was published as "Notes on the Construction of Sheepfolds"-a title which, appealing eather to the agricultural thee to the clerical mind, insured a brisk circulation among farmers-those of the bor der especially-many of whom ordered a copy in the hope that they might glean therefrom some original hints and ideas that would be of use to them In their calling.

The bucolic mind, indeed, would seem singularly predisposed to jump to hasty conclusions, for English far mers followed but in the wake of their Irish brethren-or rather of their Irish brother, who, an enthusiast on the subject of cattle breeding, greeted with delight the appearance of a little volume by Maria Edgeworth, bearing the title, "Essay on Irish Bulls." Although the name of the authoress was to him unknown, the contents would doubtless, he considered, be well worth the few shillings he so willingly disbursed; but, alas! although the spirited engraving of rampant Taurus that promise, he had but to read a few lines to find that he had become possessed of a treatise, not on bovine but at the same time quieted. Alone ruminants, but on that particular "blunder which is commonly supposed past. He bravely faced the future, to be characteristic of the Irish na

REALLY A SOUND INVESTMENT

Sanatorium Where Tuberculosis May Be Cured Is Worth Much to Any State or City.

Dr. H. L. Barnes, superintendent of the Rhode Island State Sanatorium, has recently demonstrated by some interesting studies of patients discharged as "apparently cured" from that institution that a sanatorium is a sound investment for any state or city. The gross earnings of 170 ex-patients obtained in 1911 amounted to \$102,752, and those of 211 cases in 1912 to \$112,-021. By applying the same average earning to all ex-patients of the sanstorium living to 1911 and 1912, Dr. Barnes concludes that their income in these two years was \$551,000. This sum is more than three times the cost of maintenance of the sanatorium including interest at 4 per cent, on the original investment and depreciation tharges. Dr. Barnes concludes, however: "While institutions for the cure of tuberculosis are good investments, there is good reason for thinking that institutions for the isolation of far advanced cases would be still better investments."

How Long Will the Women Stand 'Em? "I am a mean man," confessed the Erratic Thinker. "My father bore the same unenviable reputation, and I had an uncle who served a term in the penitentiary and was twice mentioned for the legislature. So no one need be surprised when I remark that perusal of the dry goods advertisements causes me to wonder how soon corsets will become so long that their wearers will be obliged to roll them up around the ankles to keep from treading on them?"-Kansas City Star.
